

Pipe support intervals

Fusiotherm lilac ®-pipe SDR 7.4

Table to determine support intervals in conjunction with temperature and outside diameter.

Difference in temperature T (K)	Pipe diameter d (mm)									
	16	20								
	support intervals in cm									
0	70	85								
20	50	60								

fusiotherm lilac ®-pipe SDR 11

Table to determine support intervals for cold water application (temperature of medium: 20° C) in conjunction with outside diameter.

Pipe diameter d (mm)										
20	25	32	40	50	63	75	90	110	125	160
Support intervals in cm										
60	75	90	100	120	140	150	160	180	200	225
